

Dental  
**Cast**

● Red

Cast is a dental material characterized by a fast combustion cycle (3 hours) and is mainly used for Partial Frame Casting in the dental market based on high precision

**Properties**

Tensile Strength :	50 MPa
Young's Modulus :	1200 MPa
Elongation at Break :	N/A
Shore Hardness :	N/A
Viscosity :	200-300 cP
