

Functional
HTR Yellow

 Yellow

HTR Yellow has a high heat resistance of over 170°C, making it suitable for manufacturing industrial components used in high-temperature processes. Also, it has high hardness and tensile strength, so it can be used for jigs and moldings.

Properties

Tensile Strength :	63 MPa
Young's Modulus :	6300 MPa
Elongation at Break :	1 %
Shore Hardness :	82 D
Viscosity :	600~800 cP
