

# UltraGLOSS™

No more manual polishing

**ASIGA®**

# UltraGLOSS™

No more manual polishing

UltraGLOSS™ by Asiga allows you to 3D print splints directly with a glossy / pre-polished surface removing the need for manual post-polishing.

No special post processing steps are required, simply 3D print the splint using Asiga's new UltraGLOSS™ material trays for a gloss finish making them available for direct issue to the patient.

UltraGLOSS™ is compatible with the Asiga MAX UV, MAX X and PRO 4K.

Available exclusively for Asiga customers.
