

UV BOX

The Ackuretta UV Box is a compact curing box lined with long-life ultraviolet LED bulbs for enhanced curing performance. The reflective stainless steel chamber and bottom mirror surface provides even curing to all sides. The UV Oven is designed with two modes, continuous and flash (10 flashes/second), to ensure all resins that react to wavelengths 365, 385, and 405nm can cure completely and efficiently, with strengthened print hardness. It is also suitable for Class I materials.

-  **Small carbon footprint**
-  **Mirror reflection** enhances curing performance
-  **365/385/405 nm mix matrix LEDs** for a thorough cure
-  **Flash function** 10 flashes/sec strengthens print hardness
-  Suitable for **Class I materials**
